

A PROPOSAL FOR UNIVERSITIES & STUDENT ASSOCIATIONS

Break it out of the game

A 48-hour blockchain game jam for students

jQrgen · Bitcoin Unlimited / Nexa

[Organizer: university, student association...] · [date TBD] · [venue TBD]

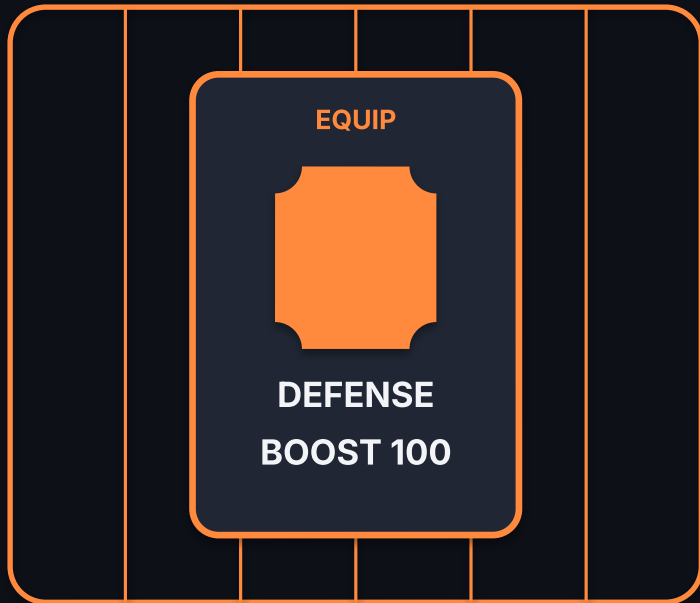

Who owns this card?

Based on: "Moving Beyond Centralized Gaming using the Nexa Blockchain"
with Steven van den Meiracker · Nexa on YouTube, 2026

THE PROBLEM

You don't own your games. You rent them.

THE GAME'S SERVER

Steam

you buy a licence to play, and that licence can be revoked

Switch 2

the game card is "just the licence key"

Your sword

hours of upgrades live on closed infrastructure

Publishers can modify, remove or discontinue your items, without you really knowing.

THE JAM

TOOLS

WIN-WIN

THE ASK

Blockchain won't "revolutionize gaming"

"You can't just put the word blockchain onto something and say, well yeah, we made it better."

Steven van den Meiracker, Bitcoin Unlimited · 03:06

Games are thriving

Studios do well. Modding communities are strong.

So blockchain must earn its place

Solve a real problem, or unlock something new.

RENTED

OWNED

THE ASK

THE KEY INSIGHT

A blockchain is a language of ownership

The game issues and uses the card. **The player holds it.**

RENTED

OWNED

PORTABLE

THE JAM

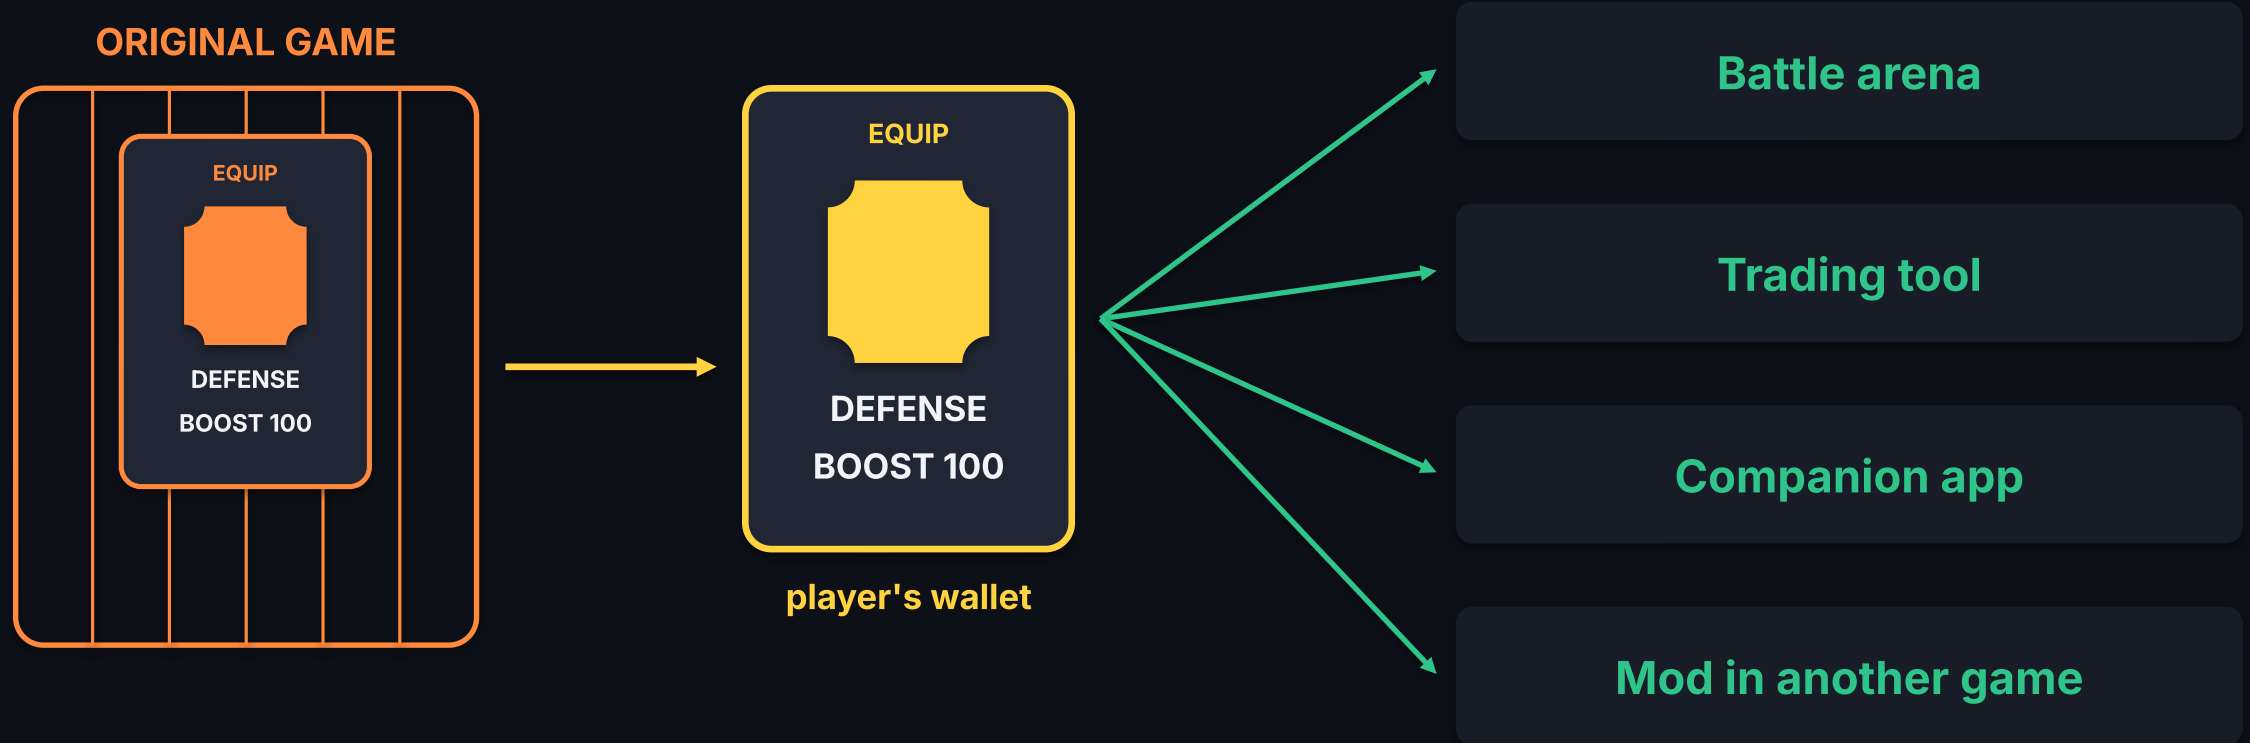

TOOLS

WIN-WIN

THE ASK

WHAT'S ACTUALLY NEW

The new part: items can leave the game

...built by anyone, "without asking permission." (21:10)

THE JAM

TOOLS

WIN-WIN

THE ASK

PROOF, NOT A PROMISE

It already exists: Nexa Warriors

165

cards, each an NFT

6

rarity tiers, set at minting

32

cards per deck, 8 can be locked

NFTs

the cards

Tokens

shards: burn + upgrade a card

Smart contracts

winner takes one card

Wally Wallet

scan a QR to log in

On-chain check

game verifies you own it

In development, testnet only at the time of the talk. No launch date announced yet.

THE ASK

WHY BLOCKCHAIN, WHY THIS ONE

Why build it on Nexa?

Near-zero fees

"a fraction of a fraction of a cent"

15:29

Native tokens

minted and moved like the base coin

15:29

Smart contracts

lock a card into a match, enforce the prize

15:29 · 25:17

Partial transactions

"I have A, I want B" offers anyone can fill

15:59

Wally identity

log in with your wallet, no password

24:16

WHAT EACH SIDE GETS

Everyone leaves with something

Students

- ▶ Ship a real game in 48h
- ▶ Hands-on blockchain
- ▶ Portfolio + [prizes TBD]
- ▶ Mentors from Nexa devs

[Organizer]

- ▶ A new kind of jam for members
- ▶ Cost: [budget TBD]
- ▶ Industry contact
- ▶ [other benefits TBD]

BU / Nexa

- ▶ New builders on Nexa
- ▶ Feedback on BON docs
- ▶ Ideas for portable items
- ▶ Meet student talent

JUDGING CRITERIA

How we judge: the talk's own test

1

Does blockchain earn its place?

solves a problem or unlocks something new

03:06

2

Does an item leave (or enter) the game?

true ownership, not just a database

20:39

3

Could a Web2 gamer play it?

easy wallet onboarding, free first try

44:27

4

Is it fun?

effort vs. reward balance

08:17

Jury: [TBD]
